

## Shelf Life and Date of Manufacture

All MAGNAFLUX Non Destructive Testing (NDT) chemical products are guaranteed to perform correctly if stored under suitable conditions and used according to the instructions. In particular the products must be stored upright in closed containers at temperatures between 10°C and 30°C. The products must be kept dry and protected from sunlight.

### Bulk materials (non aerosol)

Shelf life is 5 years from the date of manufacture.

The batch number consists of seven digits. The first two digits represent the year of manufacture and the third and fourth digits give the month of manufacture.

### Aerosol products

Shelf life is 3 years from the date of manufacture.

The batch number together with the 'Best Before Date' and 'Date of Manufacture' is printed on the underside of the aerosol can.

### Aqueous ink concentrates

Shelf life is 3 years from the date of manufacture.

The batch number consists of seven digits. The first two digits represent the year of manufacture and the third and fourth digits give the month of manufacture.

### **Note:**

- The MAGNAFLUX shelf life is the period of storage time during which the material is determined to be fully functional. The shelf life is a guideline for the time for which MAGNAFLUX has determined product quality during storage.
- Aerosols, due to slight propellant loss, may not spray as well after two years.
- The information quoted above is quoted for MAGNAFLUX products manufactured within Europe.
